Course Name: Fundamentals of Programming & Data Science	**Course Code:** CMPE-112L
Assignment Type: Complex Engineering Activity	**Dated: 02-May-2023**
Semester:2nd	**Session: 2022**
Lab/Project/Assignment #: 1	**CLOs to be covered: CLO**
Lab Title: ECAT Exam App	**Teacher Name:** Afeef Obaid

Complex Engineering Activity (CEA):

	Attribute	Complex Activities	Apply/Not Apply	PLOs Covered	Taxonomy Level
1	Preamble	Complex activities mean (engineering) activities or projects that have some or all of the following characteristics listed below:			
2	Range of resources	Involve the use of diverse resources (and for this purpose, resources include people, money, equipment, materials, information, and technologies).	Yes	5	3
3	Level of interaction	Require resolution of significant problems arising from interactions between wide-ranging or conflicting technical, engineering, or other issues.	Yes	3	3
4	Innovation	Involve creative use of engineering principles and research-based knowledge in novel ways.	Yes	4	3
5	Consequences to society and the environment	Have significant consequences in a range of contexts, characterized by difficulty of prediction and mitigation.			
6	Familiarity	Can extend beyond previous experiences by applying principles-based approaches.			

CEA Description:

Write a Python program for taking ECAT Examination. The program will display at least 10 questions with 4 choices, the user has the option to answer the question or skip it.

If the user attempts all the questions, then the test will be submitted automatically or the user has the option to submit the test after attempting any number of questions.

After submitting the test, the result will be displayed according to given criteria:
Correct Answer: 4 Marks
Wrong Answer: -1 Marks
Skip Question: 0 Marks

Program will also display the number of questions skipped, Correct and wrong answers given by the user.
